

FOR IMMEDIATE RELEASE

**BMR Suspension Single Adjustable Upper Control Arms for 2015-2019 Cadillac CTS-Vs**

**UCA631 - \$159.95**

Reduce wheel hop and add cornering consistency to your 3<sup>rd</sup> Gen Cadillac CTS-V with upper control arms from BMR Suspension! Stock stamped steel control arms with soft rubber bushings can be weak and deflect under load, making them a subpar option for when you want to take your CTS-V racing or improve its performance. Designed from 1.25-inch DOM steel tubing, BMR's Single Adjustable Upper Control Arms (UCA631) eliminate control arm flex and allow you to launch harder on the track and street. The UCA631 utilizes a chromoly, Teflon-lined rod end and includes billet aluminum rod end spacers to add adjustability to your suspension build. These Upper Control Arms are the perfect upgrade for those looking to maximize performance and reduce upper control arm deflection.

BMR Suspension has designed the UCA631 for street performance, drag racing, and road racing applications. The UCA631 is available in red or black hammertone powder coat for long lasting good looks, and installation time is about 1-2 hours. As with all other BMR Suspension products, the UCA631 is proudly designed and made in the USA!
