

FOR IMMEDIATE RELEASE

**BMR Suspension Adjustable Camber Links Poly/Rod Ends for 2015-2022 Mustang  
UCA762 - \$359.95**

Launch harder, reduce wheel hop, and add cornering consistency to your 2015-2022 Mustang with Adjustable Camber Links from BMR Suspension. The factory camber links use rubber bushings designed to reduce NVH, but can deflect under hard cornering and cause unpredictable handling characteristics, however the UCA762 replaces factory rubber bushings with polyurethane bushings and rod ends for more consistent and repeatable handling performance. CNC-Machined from Billet Aluminum, the BMR Adjustable Camber Links (UCA762) reduces flex and provides maximum strength and durability. The BMR Adjustable Camber Links (UCA762) are exceptional in assisting you to achieve on-car camber changes, especially on lowered cars. The UCA762 is 30% lighter than factory camber links and offer 6 degrees of camber adjustment. BMR has designed the UCA762 for street performance, drag race, and road race applications. Available in a durable black anodized finish for long-lasting good looks. Installation time is 2-3 hours. Proudly made in the U.S.A.
