

FOR IMMEDIATE RELEASE

**BMR Suspension Single Adjustable Upper Trailing Arms for 2015-2019 Cadillac CTS-Vs**

**UTA631 - \$159.95**

Launch harder and reduce wheel hop on your 3<sup>rd</sup> Gen Cadillac CTS-V with upper trailing arms from BMR Suspension! Stock stamped steel trailing arms with soft rubber bushings can be weak and deflect under load, making them a subpar option for when you want to take your CTS-V racing or improve street performance. Designed from heavy-duty 1.25-inch DOM steel tubing, BMR's Single Adjustable Upper Trailing Arms (UTA631) eliminate trailing arm flex and reduce deflection. The UTA631 utilizes a chromoly, Teflon-lined rod end to add adjustability to your suspension build. These Upper Trailing Arms are the perfect upgrade for those looking to maximize performance and add cornering consistency to their builds.

BMR Suspension has designed the UTA631 for street performance, drag racing, and road racing applications. The UTA631 is available in red or black hammertone powder coat for long lasting good looks, and installation time is about 1-2 hours. As with all other BMR Suspension products, the UTA631 is proudly designed and made in the USA!
