

FOR IMMEDIATE RELEASE

**BMR Suspension Camber Bolt and Stud Kit for 2006-2013 Corvette Z06s and 2009-2013 Corvette ZR1s**

**WAK560 - \$499.95**

Improve camber and alignment adjustability on your C6 Corvette Z06 and ZR1 with a Camber Bolt and Stud Kit from BMR Suspension! The suspension control arms on your Corvette can undergo serious wear over time, causing the factory frame inserts and eccentric cams to eventually fail. This produces inconsistent handling characteristics that seriously impacts your performance on the street and track. BMR's Camber Bolt and Stud Kit for Upper and Lower Control Arms (WAK560) replaces those weak factory components to improve camber and alignment adjustability. The WAK560's included durable aluminum shims and studs replace the upper front and rear control arm bolts with studs to prevent wear on the frame during alignment changes. Laser-etched camber lockout plates are also included to allow for camber adjustments from -2.1 to +1 degrees. For those looking to improve their camber adjustability and suspension control, BMR's WAK560 kit is the perfect upgrade for your Corvette Z06 and ZR1!

BMR Suspension has designed the WAK560 for street performance, road racing, and handling applications. The WAK560 is available bare and black anodized for a durable finish, and installation takes about 3-4 hours. BMR's Stud Kit (WAK561) and Camber Bolt Kit (WAK562) are also available separately. As with all BMR Suspension parts, the WAK560 is proudly designed and manufactured in the USA!

To preview all of BMR's high-performance suspension parts, please visit [www.bmrsuspension.com](http://www.bmrsuspension.com), email [sales@bmrsuspension.com](mailto:sales@bmrsuspension.com), or contact them at BMR Suspension, 1033 Pine Chase Avenue, Lakeland, FL 33815, 813-986-9302, Fax: 813-986-8055.
