

FOR IMMEDIATE RELEASE

**Third Gen GM F-Body Body Mount Watts Link  
WL330 - \$829.95**

Eliminate lateral differential housing movement and improve the handling of your Third-Gen F-body with a Body-Mounted Watts Link from BMR Suspension. Stock Panhard bars allow for some lateral movement, while Watts links eliminate all side-to-side movement. Manufactured from heavy-duty 1 5/8-inch DOM steel tubing and 3/16-inch laser-cut steel plate, BMR's Watts link is the ultimate in strength. The BMR Body Mount Watts Link (WL330) features a fabricated center pivot with a greasable Delrin bushing for smooth, bind-free movement. The links are built from heavy-duty aluminum with left and right hand threaded 5/8-inch rod ends for easy on-car adjustability. Every mounting point in BMR's Watts link is double sheer, while other companies take the easy route, sacrificing strength with single sheer mounts. The WL330 is 100-percent bolt-in and requires no cutting or modifying of the fourth-Gen chassis. BMR Suspension designed the WL330 to work well for street performance and handling applications. Available in black hammertone and red powdercoat for long-lasting good looks. Installation time is 3-4 hours. Proudly made in the U.S.A.
